# 1. Introduction

This final environmental impact report (Final EIR) has been prepared by the Western Placer Waste Management Authority (WPWMA), as lead agency, in accordance with the requirements of the California Environmental Quality Act (CEQA) and the State CEQA Guidelines (Section 15132). This Final EIR contains responses to comments received and reviewed on the draft environmental impact report (Draft EIR) for the Renewable Placer: Waste Action Plan Project. The Final EIR consists of the Draft EIR and this document.

The Draft EIR was released on October 29, 2021, for a 75-day public review and comment period that ended on January 12, 2022. The Draft EIR was submitted to the State Clearinghouse; posted on the WPWMA's website (<http://www.RenewablePlacer.com>); and made available at the WPWMA offices in Roseville, California and select libraries around Placer County. Public agencies, neighboring stakeholders, and interested parties and organizations were notified directly via email that the public comment period had begun. Two public hearings were held on December 7, 2021 (morning and evening sessions), to receive input from agencies and the public on the Draft EIR. No comments were received during either session.

## 1.1 Organization of the Final EIR

This Final EIR is organized as follows:

Chapter 1 – Introduction: describes the process for solicitation of comment to the Draft EIR and organization of the Final EIR.

Chapter 2 – Responses to Comments on the Draft EIR: contains copies of the comment letters on the Draft EIR that were received during the public review period and responses to the comments.

Chapter 3 – Corrections and Revisions to the Draft EIR: presents revisions to the Draft EIR text made in response to comments or to amplify, clarify, or make minor modifications or corrections. Text deletions are shown in ~~strikeout~~ and additions are shown in **bold underline**.

Chapter 4 – References: identifies the organizations and persons consulted during preparation of this Final EIR and the documents used as sources for the analysis.

Appendix A – Mitigation Monitoring and Reporting Program: includes a description of the CEQA requirements for monitoring or reporting programs for projects approved by a public agency. In addition, the Mitigation Monitoring and Reporting Program (MMRP) includes all the mitigation measures identified in the Draft EIR for the project, including revisions to mitigation measures as described in Chapter 3 of this Final EIR, along with the party responsible for monitoring implementation of the mitigation measures and the milestones for implementation and monitoring. The intent of the MMRP is to prescribe and enforce the proper and successful implementation of the mitigation measures as identified in the EIR for this project.
